

# The Blueprint Roadmap to World Peace

## A Communication of the Intractable Studies Institute

Patrick M. Rael, Director, [IntractableStudiesInstitute.org](http://IntractableStudiesInstitute.org)

World peace is the dream of humanity. Using **3** technologies from **Penzar** ebook:

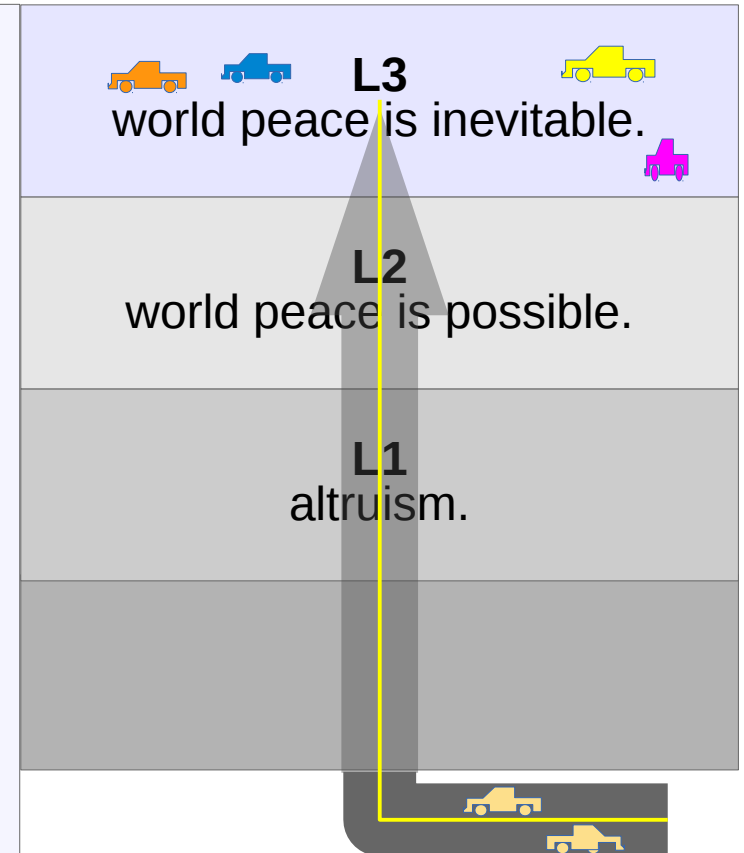

- 1) Two categories of intelligent life forms (bottom left),
- 2) The L3 IQ scale [L8-IQ-Scale is deprecated] (bottom middle),
- 3) The three conjectures of world peace (bottom right),

it is now easier to chart a path to world peace. Via **application of the L3 IQ scale** the individual and group-life-forms world actors and governments can be **measured for their L3 IQ** score. This score will be useful to determine if the individual or group life form is **helpful** or a hindrance to world peace.

**1 - Existing** leaders/actors of the world entities (people, govts, corporations,.) are **measured to determine their L3 IQ**. Any score less than 3 on the L3 IQ scale is the reason for the prevention of world peace as per the three conjectures of world peace.

**2 - Prospective** world leaders/actors can be **measured for their L3 IQ prior to elections or succession** with favor for the candidate with higher IQ on the L3 IQ scale, meaning that candidate offers a better chance for world peace.

The United Nations (UN) Security Council (SC) can be adjusted to additionally require its members to have L3 IQ. When a SC member drops below L3 IQ, it exits the S.C. **This means UN SC members are altruistic, rational and tolerant.**

### 1) Two categories of intelligent life forms (brief version):

1. Individual
2. Group

For any N intelligent life forms, there are  $(2^{N-1}) - 1$  potential group life forms as combinations of those N.

### 2) The L3 IQ Scale (brief version):

- L1 - Altruistic.**
- L2 - Rational.**
- L3 - Tolerant.**

A rule is Level N (LN) can only be reached when **lower numbered N** is achieved.

### 3) The 3 conjectures of World Peace:

**1<sup>st</sup>** – When all world leaders/actors are at L2, peace is **possible**. (necessary)

**2<sup>nd</sup>** – When all world leaders/actors are at L3, peace is **INEVITABLE**. (sufficient)

**3<sup>rd</sup>** – World peace is **no longer guaranteed** after there is a decline from L3.
