

# Utopia Androidia – a solution to labor and retirement

## A Communication of the Intractable Studies Institute

Patrick M. Rael, Director, [IntractableStudiesInstitute.org](http://IntractableStudiesInstitute.org)

Through the use of the general-purpose android robot and some structural Laws, it is possible to design a **revolutionary labor system** in a Utopian way. Utopia Androidia **combines 1 human with 1 android robot into a working pair** which have a **combined work week of 40 hours**. The brief version of the Utopia Androidia follows – The Laws of Human and Android symbiotic labor from Penzar, ch. 8 (see [IntractableStudiesInstitute.org/books/Penzar.pdf](http://IntractableStudiesInstitute.org/books/Penzar.pdf)):

**Law 1: Work Week - 40 hours/week combined.**

**Law 2: Participation - Automatic at birth, to death.**

**Law 3: Right to Android - Guaranteed right, Utopia .**

**Law 4: Tax on the pair is identical to solo human tax.**

**Law 5: Android Employed - Always employed.**

**Law 6: Android equal Salary - salary same to human.**

**Law 7: Non-Slavery Clause - Non-sentient android pair.**

**Law 8: Golden Education - Education funded 100%+.**

**Law 9: Dispersal - Graduated dispersal, not lump sum.**

**Law 10: Control of Wages - Plan A (all) or B (health) wages to human.**

**Law 11: Mechanical Immunity - Android robot cannot be sued.**

**Law 12: Human Right of Way - Human worker can take any android job.**

**Law 13: Android Equality - Virtual equalization of androids.**

**Law 14: No Android Shortage - Never a shortage of robots.**

**Law \*15: Max Education - Robot skill/edu level is capped at its human's level.**

**Law \*16: Non-Inheritance - At human death, robot and savings re-assigned.**

Note about Law 7: The robot paired with a human leads a laborious life. It legally cannot be fully sentient: If it was fully sentient, such a labor-intensive life has a name: Slavery. We do not want to make that error. Therefore, **ONLY** non-sentient androids can be paired w/humans. A fully sentient android robot will eventually want the same right as Law 2 to have a labor robot working for it so that the sentient robot can also benefit from Utopia Androidia.

A labor system based on the Utopia Androidia design has human beings working less hours yet getting full pay. Also revolutionary is there is **no need to save money** for retirement nor pay into Social Security nor IRAs nor pensions because **the robot half of the paired labor NEVER RETIRES!**

- Humans and android robots work as pairs with a required combined 40 hour work week.
- Human beings work less (or as much as they want), typically 8 hours/week for human, 32 for android robot.
- Social Security, pensions, IRAs **all become obsolete** since the robot continues working without retiring.
- All disabled worker benefit systems become obsolete since the robot continues working.
- The android is paired with human from human birth through final death, always working. At human death the robot is re-assigned to another.

### Current labor now

Human

Future

### Paired labor of Utopia-Androidia

Human

Android

1. Age 0~18: should not work, but some do.
2. Age 18~65: works  $\Leftrightarrow$  40 hours/week.
3. Age ~65+ : should retire but some must work.

1. Age 0~18: Human does NOT work, robot works.
2. Age 18~50: Pair works 40/week, human max 40.
3. Age ~50+: Human retires, robot keeps working.
